

KUNAL PATIL

Software Developer

kunalp0395@gmail.com | +91-7620643480 | Kalyan, India

GitHub | LinkedIn | HackerRank | LeetCode | Portfolio

Professional Summary

Software Developer with experience building production-ready web applications using **React.js**, **FastAPI**, **Node.js**, and **PostgreSQL**. Worked on **REST APIs**, **JWT authentication**, database optimization, and workflow automation using **n8n** and **LLM APIs**. Delivered measurable results including 40% fewer invalid requests and 60% faster database queries across projects.

Experience

Digital Word of Mouth

Feb 2025 – Mar 2026

Web Developer Intern

- Designed and delivered 50+ mobile-first, responsive UI components in HTML, CSS, and JavaScript; completed 100sprint tasks on schedule across 2 consecutive release cycles with no post-deployment rollbacks.
- Reviewed 100+ pull requests with structured feedback, authored reusable component documentation, and resolved 8 pre-release defects — enabling a clean, zero-regression production launch.

Prodigy Infotech

Sept 2023 – Oct 2023

Web Developer Intern

- Built 5 cross-browser responsive UI modules validated across 4 browsers and 3 screen resolutions; all deliverables accepted without revision across 2 consecutive sprint cycles.
- Implemented 2 authentication flows with client-side input validation, reducing login errors by 25% and resolving 6 front-end defects tracked on a Git-based sprint board.

Skills

Languages:	Python, JavaScript
Frontend:	HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, FastAPI, Flask
Databases:	SQL, NoSQL, MySQL, MongoDB, PostgreSQL
Tools:	Git, GitHub, Postman, VS Code, REST APIs
Automation & AI:	n8n, Twilio, ElevenLabs, LLM APIs

Projects

AI Voice Calling Agent | *n8n, Twilio, ElevenLabs, Google Sheets, LLM APIs*

GitHub

- Engineered a fully automated voice-call pipeline in n8n orchestrating Twilio for call delivery, ElevenLabs for AI speech synthesis, and LLM APIs for dynamic script generation — completing end-to-end call cycles and logging results in under 90 seconds per record.
- Automated processing of 100+ call records via extraction logic for name parsing and phone number normalization, eliminating all manual pre-call data entry.
- Hardened pipeline reliability with event-driven triggers, retry-on-failure handling, and structured JSON logging, reducing manual monitoring overhead significantly.

Notezy – Notes & URL Shortener Platform | *React, Tailwind CSS, FastAPI, PostgreSQL*

GitHub

- Architected 12 RESTful API endpoints for note CRUD, URL shortening, and QR code generation; rate limiting blocked 40% of malformed requests during load testing.
- Scaled to handle 300+ concurrent short-link requests without data loss using indexed PostgreSQL tables and connection pooling.
- Applied composite indexing strategies that reduced peak-load degradation by 30%, maintaining sub-100ms retrieval times under stress-test conditions.

Spotify Clone | *MongoDB, Express.js, React.js, Node.js*

GitHub

- Instituted a **2-role access system** (listener, admin) and integrated a **CRUD** admin panel to manage 1,000+ songs with role-based permissions.
- Orchestrated **MongoDB** compound **indexes** and **pagination**, reducing average **query response time** by 60% and maintaining search/filter responses under 200 ms across tested dataset sizes.

Education

University of Mumbai

Bachelor of Engineering (BE) – Computer Engineering

Mumbai, India

Aug 2021 – May 2025

Certifications & Awards

- Decode Python with DSA – PW Skills:** Completed structured certification covering **Python** and **Data Structures & Algorithms**.
- HackerRank SQL Silver Badge:** Achieved Silver level in **SQL**.
- LeetCode Biweekly Contest 177:** Secured Global Rank **1827**.
